# Perfect decontamination

HYGENIC WASHING MACHINES AND DRYERS WITH **OZONE GENERATOR**

**Ozone** is a natural gas that becomes pure oxygen in contact with water and acts by dissolving organic matter.

**An ozone generator** is a device that connects to a washing machine, mixes ozone with water and acts on viruses and bacteria in the process of laundry washing. Ozone attacks the cell membranes that cover them and deactivates them. The result is clean and disinfected laundry.

## QUICK CLEAN - 3 MIN PROGRAM

The user can start a fast, three-minute cleaning cycle of the washing machine to ensure complete cleanliness before starting the main program.

## AUTO DOSING SYSTEM

LG professional devices are adapted for use in an **automatic dosing system**

Beside devices, as a complete solution, we can offer you:

- superior dosing pumps
- specially designed detergents for laundrettes.

## SPECIALLY DESIGNED DETERGENTS FOR LAUNDRETTES

With LG professional appliances, we recommend **high-quality detergents** that are especially suitable for laundry.

Liquid detergents can be dosed automatically and adapted for fast washing cycles and low temperature programs.

Thanks to their hygienic properties, in addition to LG hygienic devices, they provide complete safety and cleanliness of the laundry.
