Product Range

Are you

READY FOR BUSINESS?

The Pro Formula product range combines the familiarity of a recognised brand with the cleaning power needed for the demands of a business.

While running a business you likely have many roles to fill; from being a host, a manager and even a professional cleaner – all in a days work. We can imagine time is not something you have a lot of.

That's where Pro Formula by Diversey comes in. Pro Formula by Diversey

provides a full range of professionally formulated cleaning products, paired with trusted Unilever brands, such as Omo, Cif and Sun.

The range is developed specifically for your business needs to give you peace of mind and excellent results the first time – getting you ready for business.

Perfume Free Solutions

You can recognize our perfume free solutions by this logo. Our perfume free products are safe to use around food preparation areas.

6 X 1L
SKU: 100958288

STAIN FREE WASHING TIPS & HINTS

Remove red wine

Ensure the stain doesn't set by immediately applying salt or carbonated water. Then rinse in warm water and sponge in warm detergent solution overnight. Wash immediately with Omo Professional White on the highest temperature the fabric will allow. This will make the wine stain oxidise.

Remove coffee & tea

Put into soak or wash as soon as possible with Omo Professional White, preferably at 60 degrees. The combination of bleaching agents and heat will make the stains disappear.

Remove candle wax

When wax is dry, remove any excess with a blunt knife. Now sandwich the fabric between blotting paper or kitchen towel, then iron over the mark to melt out the remaining wax. If necessary use grease stain remover for the last traces, then wash as normal using Omo Professional White.

Remove jam

Fresh stains usually wash out. Soak old stains in Omo Professional White, then wash as normal using Omo Professional White.

Remove blood & protein

Soak immediately in cold, salty water. Don't use hot water as it will set the stain. For heavily stained items, keep changing the water until it is clear, then wash with Omo Professional White. If the stain is old or persistent, soak in cold salty water for several hours and then wash as usual. For very persistent stains soak in a tepid solution of Omo Professional White. Rub gently around the edge of the stain with the soaking solution before leaving to soak.

Remove grease

Wash as normal using Omo Professional White, on the highest temperature the fabric will allow. If the stain is not removed, try a substance which will dissolve grease, such as thinner. Wash again.

Remove oil

Read the care label fully first. Large stains may need to be dry cleaned, or treated with a grease stain remover. Small, recent stains can be treated by rubbing talc into the fabric, leaving it for 30 minutes, before brushing off and washing as normal with Omo Professional White.

LAUNDRY

Omo Professional White

Omo Professional White is an enzymatic Zero-P detergent powder, based on an effective blend of surfactants, water hardness sequestrants, anti-greying and anti-corrosion agents, alkaline salts and a medium temperature bleach system. The product contains a bleach system for application at low-medium temperatures (40-60) resulting in an excellent tee and fruit stain removal.

1 X 87 WASH
SKU: G12350

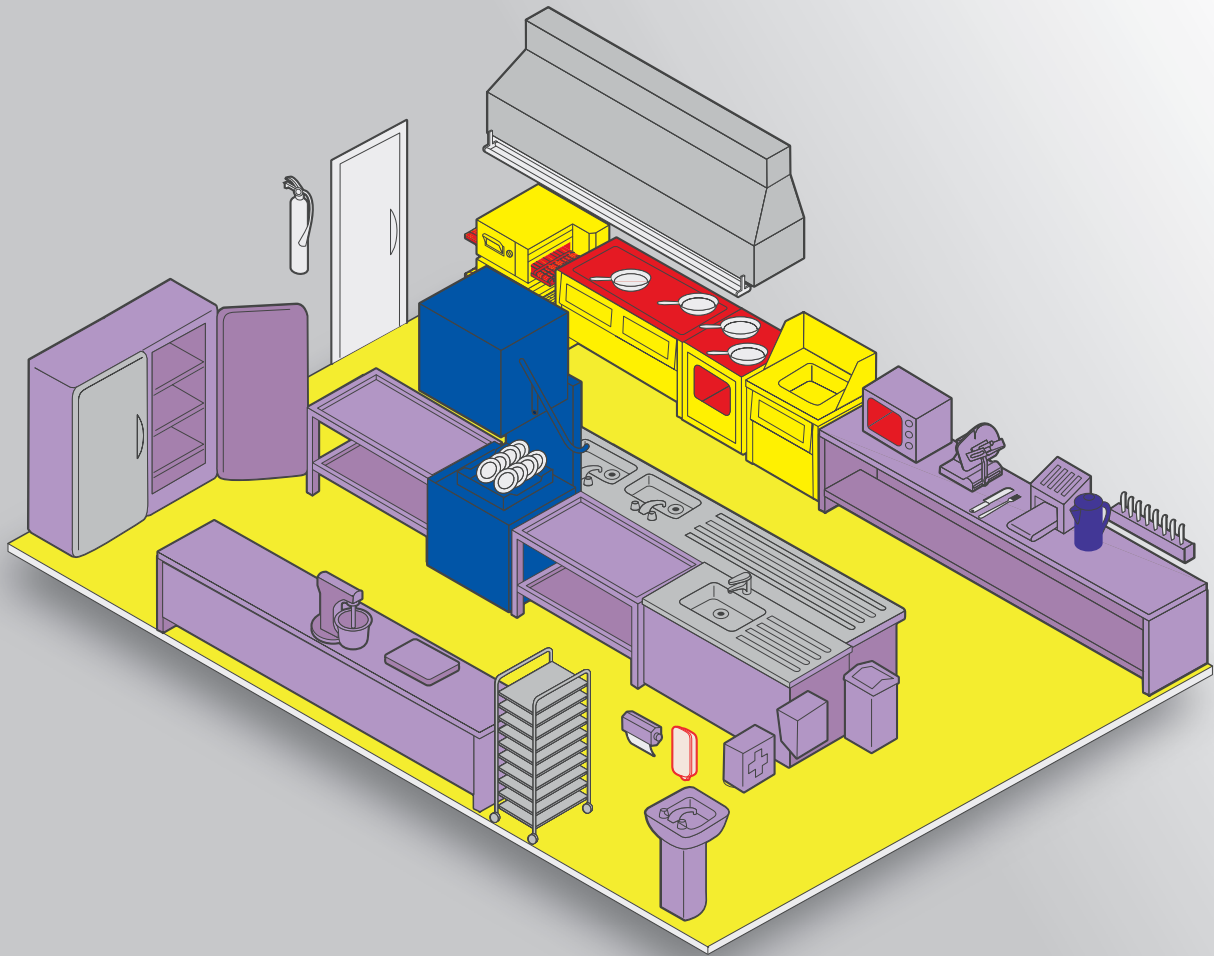

Coccolino Concentrate

Coccolino Concentrate is a fabric conditioner based on cationic detergent, co-actives and perfume. It contains a pleasant perfume, which is delivered n clothes very effectively via cationic particles, acting as a carrier.
